

## Smooth Textured CMU for High Performance Coated Masonry Walls

Perfect for applications  
requiring smooth, durable  
and cleanable surfaces

Specially formulated CMU  
mix design creates the  
perfect tight and smooth  
substrate for application of  
coatings

Superior finish texture

Saves time and money  
during construction

# Spec-Finish®

COATED MASONRY SYSTEM

**Spec-Surface block (bottom) vs. Ordinary CMU**  
The smooth and tight surface texture of Spec-Surface Block saves money by requiring fewer filler coats

SPEC-FINISH® combines special smooth and tight textured SPEC-SURFACE™ block from CPG with high performance coatings from Tnemec. SPEC-SURFACE may also be used with ordinary paint coatings

## Primary uses

- Coated walls where a pinhole free surface is required.
- Coated walls for applications requiring a high performance surface finish, such as hospital interiors, food preparation areas, animal care facilities, clean rooms, restroom facilities and other areas requiring easy cleaning and/or maintenance of hygienic conditions.
- Coated walls for high vapor conditions, such as indoor swimming pools, aquariums or vivariums

## Features

- SPEC-FINISH blocks are made with a special mix design including a pre-conditioner that results in an especially tight and smooth surface texture.
- SPEC-FINISH walls offer superior performance for applications with exacting hygienic requirements – both the block and mortar joints are fully coated, and the coatings may also be applied to flooring and ceilings to provide comprehensive coverage

## Construction Efficiency

- The smooth and tight surface texture results in labor and time savings when compared to using traditional CMU by minimizing need for block filler layers prior to painting or coating.
- SPEC-FINISH is significantly less expensive than alternate approaches for its intended applications, such as glazed tile or CMU.

**Spec-Finish Level III vs. Coated Regular Block**  
The combination of high performance coatings and Spec-Finish block provides a pin-hole free, easily cleaned, durable smooth surface

Tnemec Coatings are available in a wide variety of colors

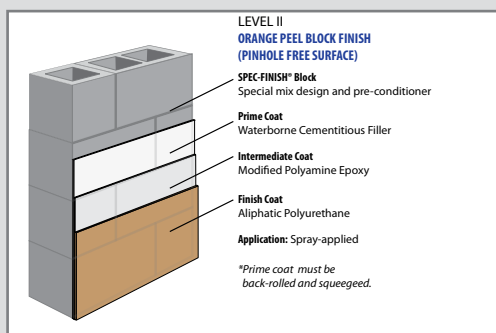

# SPEC-FINISH® System Levels

FOUR CHEMICAL-RESISTANT, HIGH-PERFORMANCE FINISH LEVELS TO MEET A VARIETY OF AESTHETIC AND PERFORMANCE REQUIREMENTS

*Standard Block Finish  
(Level I)*

*Cost-Effective for Lighter Duty  
Applications*

*Orange Peel Block Finish  
(Level II)*

*Pin-Hole Free Surface for greater  
cleanability*

*Smooth Block Finish  
(Level III)*

*Pin-Hole Free Surface with Smooth  
Finish*

*Smooth Block Finish  
(Level IV)*

*Pin-Hole Free Surface with Mini-  
mal Joint Appearance and Highly  
Durable Fiberglass Reinforcement*

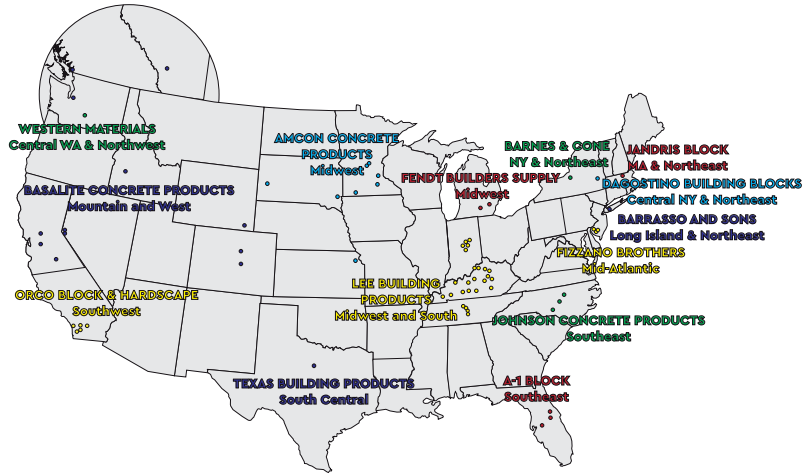

**Note:** For specific coatings product series recommendations based on desired performance, gloss level, finish texture, and compliance with local air quality regulations, contact your Tnemec representative by calling 1-800-TNEMEC1 or visiting [www.tnemec.com/company/contact](http://www.tnemec.com/company/contact).

## Solutions Available Nationwide

The Concrete Products Group (CPG) consists of regional market leaders in the concrete products industry. CPG is organized to provide consistent, top-quality products to regional and national customers. CPG provides industry leading support and service throughout the nation.

We provide a comprehensive set of design resources to support designers, including a library of CAD Details, a Thermal properties guide, design and construction notes and videos and color selection and rendering tools that are available via a Revit® plug-in.

Please contact us if we can assist with your next project.
